

# COVERALLS

Protection of body – Single use

## TYPE OF USE

These light and flexible coveralls are ideal for boat maintenance without getting dirty (antifouling, paint, filler,...).

They are designed to protect against hazardous substances and contamination by products or people, and are typically used, depending on the degree of toxicity and the environment, to protect against light spray, liquid aerosols, or low pressure/low volume splashes, airborne solid particulates.

Exposure to certain chemicals or high concentrations may require higher barrier properties of the fabric, or in the construction of the suit.

Such conditions can be protected by garments made to the standards of Types 1 to 4 or possibly by a more protective material.

## TECHNICAL FEATURES

<b>Model :</b>	- Chemical protective coverall. - With 3 pieces elasticated hood. - Front zip fastening under large flap with self-adhesive tape. - Elasticated waist, wrist and ankle.
<b>Material :</b>	- Soft laminated fabric (polypropylene + microporous film). (Coated fabric).
<b>Weight of fabric :</b>	- 65 gsm.
<b>Colour of fabric :</b>	- White.
<b>Sizes :</b>	- L, XL.
<b>Packing :</b>	- Individual polybag.

## ADVANTAGES

- High quality of the fabric, breathable, anti-static and anti-bacterial.
- Impeccable quality clothing with good comfort and good ease of movements for the user (three-pieces hood).
- Zip storm cover flap with self-adhesive tape up to the hood.
- Hood, wrists and ankles with elastic ensure a perfect seal with other equipments.
- Presentation in individual polybag.

## CONFORMITY

This coverall has been tested and approved according to the following standards:

- **EN13982-1: 2004; type 5-B.** Performance requirements for chemical protective clothing providing protection to the full body against airborne solid particulates.
  - **EN13034: 2005 + A1/2009; type 6-B.** Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals.
  - **EN14126: 2003/AC:2004.** Performance requirements and tests methods for protective clothing against infective agents.
  - **EN1073-2: 2002.** Class 1: Requirements and test methods for non-ventilated protective clothing against particulate radioactive contamination.
  - **EN1149-5: 2008.** Protective clothing. Electrostatic properties. Material performance and design requirements.
- It complies with the European Directive **89/686/EEC** on Personal Protective Equipment (**PPE**). PPE of Cat III (art 11).  
EC type examination certificate issued by **the Centro Tessile Cotoniero e Abbigliamento S.p.A GS**, Notified Body **No. 0624**.
